### ONE MAN PUT TO WORK.

There is one man less out of work tolay than there was yesterday. The lucky or unlucky man, according to the standpoint from which the reader looks, at work is Prof. J. A. Allen, of the Natural History Museum, who has been engaged to look up the pedigrees of Chiko and Johanna, the social leaders in Central Park's zoological circles just now. Prof. Allen's job is to find out whether Chiko and Johanna are chim-

apes, we of the higher Darwinian strain cannot afford to recognize them as of our set, and we must give them the cold and unimistakable skewgee at once.

But the Park Board has done a good thing in hiring Prof. Allen to investigate our distinguished monkey guests. It has pointed a way to the solution of the great problem of giving employment to the unemployed. A lady wrote to this office yesterday saying that she had a large white cat with lovely blue eyes.

of course, this has all been in the cause of humanity and civilization. But now the condition of affairs has undergone a change, and intelligence reaches us of a "great disaster." Two columns of the English civilization spreaders, numbering together probably nearly two hundred men, who were pursuing the fugitive King and his warriors with the Christian intention of wiping them off the face of the earth, have been led into an ambush by the Matabeles and, as the story goes, annihilated.

This, of course, changes the whole character of the war. The shooting down and bayonetting or sabring of thousands of the natives by the invaders were all "glorious victories."
